Ten Reasons Why *You Should Plant* **FORD'S SOUND SEEDS**

BULBS, PLANTS AND PERENNIALS

1. **BECAUSE**, They are selected from the Best Strains of the Best Varieties. Our aim is to eliminate all varieties not having outstanding merit.
2. **BECAUSE**, Ford's Sound Seeds are tested. None but those showing satisfactory germination are sold for planting.
3. **BECAUSE**, We carefully adjust all complaints for anything bought of us that is not perfectly satisfactory when received.
4. **BECAUSE**, We give more good seeds for the money sent us than are offered by others.
5. **BECAUSE**, We give the full value of the money sent us in seeds, bulbs, etc., instead of colored pictures, high city rents and other unnecessary expenses.
6. **BECAUSE**, Our 48 YEARS IN BUSINESS has taught us the needs and requirements of our customers and enables us to handle orders satisfactorily.
7. **BECAUSE**, We refill order or refund money for any seeds that under favorable conditions fail to grow. (If you should ever have occasion to enter a complaint, give date of planting, condition of soil and weather, amount and variety ordered, number of order, stock number appearing on the package and price paid for same.)
8. **BECAUSE**, We give **DISCOUNTS** to **MARKET GARDENERS** and large planters as follows:
 - On orders amounting to \$ 10.00 or over, 2%.
 - On orders amounting to \$ 25.00 or over, 3%.
 - On orders amounting to \$ 50.00 or over, 4%.
 - On orders amounting to \$100.00 or over, 5%.These discounts make our prices very low.
9. **BECAUSE**, We try to be of real valuable service to each of our patrons, giving such information and help as we are able to render to make their garden operations pleasant and profitable.
10. **BECAUSE**, For 48 years we have endeavored to treat our customers, whom we consider our friends, as we would have them treat us. Hundreds of them have bought from us for many years and have been perfectly satisfied. Our "live and let live" policy will be continued. We want to extend the courtesies of our organization to all who receive this catalog and count each one as a friend. We will do our part to make this friendship worth while.

"Your seeds are O. K. None better. Have used them for 20 years and if I live many more years will continue their use."—Mrs. A. Weber, Ohio.

"I am again sending a small order for Hardy Perennial Flowering Plants. An order that I purchased from you two or three years ago was very satisfactory and we have enjoyed the flowers very much. With best wishes for a successful season, I remain."—F. H. Ballou, Ohio.

"Received the seed Corn in fine shape and am perfectly satisfied and thank you for your promptness."—Louise Norman, Ohio.

"I have used your seeds since 1912; I think I have missed only two seasons sending to you for my seeds. Seems that I cannot have a nice garden when I use other seeds."—Mrs. A. J. Londenslager, Ohio.

"I use your seeds as I have such good luck with them."—Mrs. Metta Bates, Ohio.

"I received my seeds and everything was in first-class shape."—Chas. Gordon, Pa.

"We always buy our seeds from you and think they are the best we can buy."—Mrs. Howard Mullen, Ind.

Ford's Glad
Gardener.

FORTY-EIGHTH YEAR

ANNUAL GREETING

Ford's Glad
Gardener.

The first and most important item to the gardener is good tested and reliable seeds. No one realizes this more keenly than I do. Therefore it is my aim to put quality first. No one can furnish you with seeds that are worth more than the ones I supply, no matter what the price charged may be.

If I give you the best seeds that grow, which I honestly aim to do, and as hundreds of my customers will testify that I do give, I have done all anyone can do in that line.

I want to go farther in rendering service to my customers than giving you the Best Seeds possible. I want you to share in the saving I am able to make, due to comparatively low expenses. We are located in our own buildings just outside of the city limits of Ravenna and have no high city rents to pay. We issue this simple yet comprehensive catalog without colored pictures. (This item alone is a big saving of unnecessary expense.) I put in full time and overtime myself. All of these savings you will find reflected in the prices I am making in this book.

I am satisfied that I am offering as low or lower prices than are offered in other market gardeners' lists, and I am NOT sacrificing quality to do it.

If our forty-eight years in this business in the same place is of any value to you; if the service we are willing to render appeals to you; if the highest quality is what you want; and if our prices are comparatively low—I feel that I am justified in urging you to send me your order. I will see to it that you get a "Square Deal" and that your order, large or small, will be given careful attention. I know that the business placed with us will be satisfactory to you.

I thank you for the splendid business given us in the past.

Sincerely,

J. H. FORD,

Pres. and Mgr. Ford Seed Co.

Ravenna, Ohio, 1929.

CLUB ORDERS

By Club Orders we mean, where five or more persons send in orders together, to be shipped to one person or to separate parties to suit purchaser.

Each order should be made out on a separate paper, full instructions how to ship should be given. When all are to be shipped to one address, the different orders will be put up separately and marked so there will be no difficulty in delivering them when they are received.

A CHANCE TO MAKE MONEY

10% commission to those who will get up club orders. A good way to make some money for yourself, grange, lodge, class, church or other group. Boys and girls often make a nice sum of money by getting up club orders. Grange organizations send us the orders of many of their members. Each order of a club order is entitled to a discount as per inside front Cover Page, and then you are entitled to a 10% discount on the total amount after deducting discounts allowed on

the individual orders (provided they are large enough to be entitled to discounts as per inside front cover page).

The 10% club order discount will be allowed on everything quoted in this catalog except clover and grass seed and baby chicks.

SIGN YOUR NAME. Your name, post office and state should be distinctly written every time you write to us.

Letters Requiring an Answer, and list of names, should be written on a separate sheet from the order.

Terms: Cash with order or one-fourth the amount with the order and balance before shipment or C. O. D., as we sell on such a close margin we cannot afford to deviate from these terms.

Discounts will be allowed as shown on inside front cover page.

How to Send Money. By Express Money Order, Post Office Money Order, Check, Draft, or Registered Letter, at our risk. We assume no risk if you remit in coin, currency or stamps enclosed in letter and not registered. **Do not moisten or tear stamps apart.**

Shipping Facilities. Ravenna is one of the best shipping points in the United States. We have three railroads, the Erie, Pennsylvania, and Baltimore & Ohio, also electric lines. All these lines carry express. No matter where you live, we can reach you quickly.

About Shipping. When shipments are to be made to stations having no agent, pre-payment of charges is necessary, hence we ask our patrons at such points to add enough to their remittance to cover charges. If you send too much, we will return the balance in money. When no shipping directions are given, we use our judgment to determine the route and method which will be most advantageous to our customers.

Errors. The utmost care is taken to fill all orders to the letter; but, if any errors occur in count or omission, please notify us at once, and they will be cheerfully corrected. Shortage or damage, however, must be reported at once on receipt of goods, or no claims will be allowed.

Order Early. Please order as early as possible; this will enable us to give better service, as late in the season we are crowded to our utmost capacity. All orders for seeds will be shipped as soon as possible; plants, trees and bulbs as early as season will permit. We reserve the right to substitute unless the order is specially marked **no substitutes**, but in all such cases we will supply a variety as nearly as possible like the one ordered.

FREE DELIVERY BY PARCEL POST DIRECT TO YOUR POSTOFFICE, anywhere in the U. S., on all goods listed in this catalog, unless otherwise stated. If shipments are to be made by express or freight, deduct from the pre-paid prices 3c from ¼ lb., 10c from 1 lb., 12c from 2 lbs., 14c from 3 lbs., 18c from 5 lbs., 28c from 10 lbs.

We Guarantee the safe arrival of all shipments made by us. Provided that any damage on account of delay in transit or loss by breakage or leakage or other causes is noted on your express or freight receipt and the same sent to us on receipt of the shipment. The same applies to Parcel Post shipments. In case of damage we put in a claim against the forwarder and remit to our customer as soon as collection is made, or our customer may put in a claim; in which event we will supply the necessary papers.

We guarantee our seeds to grow under favorable circumstances. Since there are so many conditions upon which the crop depends, we give no warranty, expressed or implied, as to description, quality, or productiveness, and we will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are at once to be returned and the money paid will be refunded cheerfully. Should any seeds, plants or trees sold by us prove untrue to name, we will, upon proper proof, refill the order or refund the money.

Market Gardeners and large planters will find discounts on inside front cover page.

WE LIMIT OUR LIST OF VARIETIES TO THE VERY BEST

ARTICHOKE

LARGE, GREEN GLOBE. Bears large flowerheads, which are prepared for eating the same as asparagus. The seed may be started in a hot bed, or in open ground when all danger of frost is over. When ready to set in the garden make rows 4 feet apart and set plants 2 feet apart in the rows. The plants when mulched, will live through the winter. Pkt. 10c, ½ oz. 40c, oz. 75c.

JERUSALEM, GIANT OR WHITE FRENCH. Valued for feeding stock; an excellent conditioner, particularly good for preventing hog cholera. Propagated from tubers, and may be cultivated the same as potatoes, producing immense crops. Lb. 33c, 3 lbs. 74c. Not pre-paid, lb. 23c, 10 lbs. \$1.50, 50 lbs. \$3.50.

ASPARAGUS

Seed should be sown early in spring covering the seed 1½ to 2 inches deep. When the seedlings are one or two years old, they may be transplanted to the permanent bed. For home garden set plants 16 to 18 inches apart each way. In field culture make rows 4 feet apart and set plants 1 foot apart in the rows, with the crowns 4 to 5 inches below the surface. Rotted manure should be applied to the beds in the fall after cutting away the tops. Nitrate of soda, applied in the spring before growth starts, is beneficial when no rotted manure is used. Keep the beds thoroughly cultivated, which may be done before growth starts in the spring. Time will be saved by buying roots instead of seed.

MARY WASHINGTON. This is the result of years of selection and plant breeding by the U. S. Dept. of Agriculture, to obtain a rust proof variety and has proven rust resistant in localities where Asparagus rust is prevalent. The shoots are large, straight, with closely folded tips. Color dark green, high quality, tender, and remarkably productive. Without doubt the best of all Asparagus. Pkt. 8c, oz. 18c, ¼ lb. 58c, lb. \$1.60, 5 lbs. \$6.63, 10 lbs. \$12.78.

GIANT ARGENTEUIL. Large purple stalks, tender and of fine quality. Pkt. 5c, oz. 13c, ¼ lb. 33c, lb. 75c, 5 lbs. \$3.18, 10 lbs. \$5.28.

PALMETTO. Light green; early, large and productive; quality of the best. Pkt. 5c, oz. 13c, ¼ lb. 33c, lb. 75c, 5 lbs. \$3.18, 10 lbs. \$5.28.

"You have proved that you are an honest farmer, for which I rejoice, as I like to order seed from you as I do of no other firm."—C. E. Hood, N. Y.

"Was so well pleased with the seeds that you sent me before that I hope to always send to you for garden seeds."—Jno. Hunter, Ohio.

"The Onion Sets I bought from you last year were the finest I ever got and grew up to fine crops of large-sized onions. Thank you."—Andrew Fox, Ohio.

ASPARAGUS ROOTS

Two year old roots set out in the spring may be cut the following spring, while one year roots will not produce a crop for two years. For family use we would advise setting 50 to 100 roots according to size of family.

Profit in Asparagus

An asparagus bed, when once established will continue to produce crops for many years and yield larger returns per acre than almost any other crop. It is always in good demand and lasts for a long season. Write for special prices on 5,000 lots or over.

BROCCOLI

Similar to cauliflower and is prepared for the table in the same way. The seed should be sown and cared for in the same way as cabbage or cauliflower.

EARLY PURPLE CAPE. Heads are of medium size, compact, and slightly purplish in color. Plants are hardy. Pkt. 7c, ½ oz. 25c, oz. 40c, ¼ lb. \$1.28, lb. \$4.35.

Italian Green Sprouting, Also called Calabrese. A decidedly fine variety of excellent quality and good for market. The plant forms a large, solid, green head. When the central head is cut, sprouts come out from the leaf axes, each terminating in a small head which is equally as good as the first. Pkt. 15c, ¼ oz. 50c, ½ oz. 75c, oz. \$1.25, ¼ lb. \$3.28, lb. \$10.10.

BRUSSELS SPROUTS

An erect-growing plant whose stalk is closely covered with light green buds resembling small cabbages which should be cooked in the same manner as cabbage or cauliflower. Seed may be sown early in May; later the plants may be set about 2 feet apart and cultivate like cabbage.

FORD'S GIANT PROLIFIC. The stalk is large and grows 2 feet or more in height. The little sprouts are set very closely together and usually develop about the same time. The Sprouts at the base of the stalks are usually as tightly folded as those at the top and require but little trimming to prepare for the table or market. Pkt. 6c, ½ oz. 15c, oz. 20c, ¼ lb. 78c, lb. \$2.60.

If planted later in the season they can be stored for winter use and will retain their freshness for a long time if packed in sand or stored in a pit. Mangel Wurzels and Sugar Beets

Deep soil produces the largest crops. Sow in rows 18 inches to 2 feet apart, 1 inch deep, and when the plants are 3 or 4 inches high they should be thinned out 6 or 8 inches apart. Transplant when the ground is moist, pinch off the leaves about 2 inches above the root, and set the plants into the soil up to the crown. On good, deep soil 1,000 to 1,500 bushels per acre can be raised. Mangels make excellent feed for stock of all kinds.

Ford's Glad Gardener says "Plant more Wurzels."

CABBAGE

Cabbage seed has been a specialty with us for years, and our customers say the seed is good, because they get good results, and that is always the final answer. One customer wrote us that "From one and one-half acres of Glory Cabbage we sold \$650 worth." Another writes that from 1,000 plants grown from Ford's Seed he raised 1,000 solid marketable heads. If space permitted, we could print hundreds of testimonials from our customers, about our cabbage seed.

Ford's Glad Gardener says, "Glory is the Best Cabbage."

HOW TO GROW CABBAGE.

For early, the seed should be sown in hotbed in March. For general crop, sow seed the latter part of May in open ground and in July transplant into rows 2½ by 2 feet or more for large-growing varieties; cultivation often.

Ford's Glory, the Best of all Cabbages

FORD'S GLORY CABBAGE

Highest Quality of All

Our Most Popular Cabbage—An Every Purpose Variety

THE BEST OF ALL CABBAGES. Glory has proven satisfactory wherever it has been planted. It matures quite early—about as early as the Copenhagen Market, but makes a larger head than that variety, is very solid and does not burst badly. The stems are short, heads almost round, slightly flattened at the top and are extremely solid, with very small core. There are few loose leaves, which is a great advantage, as the plants may be set very close together. The heart is white crisp-fine-grained, and tender, and cooks quickly. Owing to its earliness and the hardness of the heads it is an unusually good market sort. If the seed is sown in this latitude between June 1 and 10, it will produce excellent heads for winter use. It always sells for top price in market. The best of all for Kraut. Pkt. 10c, ½ oz. 20c, oz. 30c, ¼ lb. 78c, lb. \$2.60, 5 lbs. \$11.43, 10 lbs. \$21.28 prepaid.*

"I have been using your garden seeds, especially the Glory Cabbage Seed for ten years. I find none better; you can rely on them when you plant them."—Mrs. Lena Lykins, Mich.

"Your Glory Cabbage certainly beats any cabbage I ever raised and I have been raising cabbage for 50 years."—Mrs. Oliver Harwood, O.

WISCONSIN HOLLANDER No. 8. A "Disease Resistant" strain of the famous Danish Ball Head. It is the result of years of selection of disease free plants grown on infested fields where it withstands the ravages of "yellows" and produces a big crop. In all other respects it is similar to the Danish Ball Head. Our source of supply is reliable and we recommend this variety to our friends who have had trouble with the "yellows" disease. Pkt. 12c, ½ oz. 40c, oz. 75c, ¼ lb. \$2.38, lb. \$8.10.

Copenhagen Market. Very early, maturing only a few days later than Early Jersey Wakefield. Heads round, medium size, fine quality, solid. A very popular early round headed variety. Ships well on account of its round solid heads. Pkt. 7c, ½ oz. 20c, oz. 30c, ¼ lb. 78c, lb. \$2.60, 5 lbs. \$11.43, 10 lbs. \$21.28.

Making it the earliest round head cabbage in existence. Heads medium size, solid, does not burst badly after maturity. Pkt. 10c, ½ oz. 25c, oz. 40c, ¼ lb. \$1.28, lb. \$4.60.

EARLY JERSEY WAKEFIELD. Very early, pointed heads, fine well known variety for market. Our seed is of an extra choice strain. Pkt. 7c, ½ oz. 20c, oz. 30c, ¼ lb. 78c, lb. \$2.60, 5 lbs. \$11.43, 10 lbs. \$21.28 prepaid.

LARGE JERSEY WAKEFIELD or Charleston. A few days later than Early J. Wakefield, a little larger, otherwise very similar. Same price as Early J. Wakefield.

Danish Ballhead. The most popular late good variety of Danish origin and much prized by American growers on account of its solidity and great keeping qualities. It may be healed in the fall, and in the spring will be found to have retained its fine quality. Our seed is the solid-headed, short-stemmed type. Pkt. 7c, ½ oz. 20c, oz. 30c, ¼ lb. 78c, lb. \$2.60, 5 lbs. \$11.43, 10 lbs. \$21.28.

PENN. STATE BALL HEAD. A highly developed and improved strain of Ball Head, representing ten years of careful breeding by the Penn. State College. It produces more tons per acre and is less subject to disease than the original strain of Ball Head.

The much larger crops grown from this variety will justify our customers in paying the higher price asked for it. We are confident you will be highly pleased with its quality and the big profits it will return to you. Carefully grown and selected seed. Pkt. 15c, ½ oz. 40c, oz. 75c, ¼ lb. \$2.53, lb. \$8.10.

Cabbage Is Easily Grown and Profitable

"FROST PROOF" CABBAGE PLANTS

Will Mature Heads Two to Three Weeks Earlier Than Your Home Grown Plants and Double Your Profits.

These are grown in the Southern States, where the soil and climatic conditions are suited for growing tough, hardy plants during the Winter and early Spring. They can be shipped to territory farther north and be planted in the open ground a month to six weeks sooner than the home-grown hot bed plants. These will stand a temperature of 20 degrees above zero without injury.

To get the advantage of these frost-proof plants they must be planted a month or six weeks earlier than home-grown plants. We fill orders from December 1st to May 1st.

The plants when received will be wilted and have a hard stunted appearance. Regardless of appearance, they will produce the crop results.

Ford's White Surehead Cauliflower

CHINESE CABBAGE

Pe-tsai belongs to the Cabbage family, and was introduced into this country from the Orient. For early use, sow in hotbeds in February or March. When weather is warm, transplant to open ground. Make rows 2 1/4 ft. apart and plants 1 ft. apart in row. For main crop, sow in July or August. When well grown, tie the plants up loosely to blanch. If taken up and roots packed in sand they will keep in cellar for winter use.

PEKING. Head somewhat spreading; heart blanches creamy white, crisp, and with celery-like flavor. Pkt. 6c, 1/2 oz. 15c, oz. 25c, 1/4 lb. 73c, lb. \$2.35.

PAOTING. Head compact; foliage in-curved. Grows as well during the summer as in cold weather. Heads frequently 15 pounds. Pkt. 8c, 1/2 oz. 20c, oz. 30c, 1/4 lb. 88c, lb. \$2.85.

CAULIFLOWER

Soil should be deep and rich, with plenty of moisture. Sow the seed in early March in hotbeds, then transplant to coldframes and gradually harden off the plants. For late Cauliflower sow seed the last of May.

Early Snowball. Our seed of this very popular variety we believe to be equal to any Cauliflower offered under the name of Snowball and perhaps many other names. It is our aim to have it the best and of a type that will give to the gardener the utmost satisfaction. Our strain is early, plants of medium size, heads large, pure white, very solid, deep and of excellent quality. Suitable for early or late crop. Pkt. 15c, 1/4 oz. 60c, 1/2 oz. \$1.00, oz. \$1.75, 1/4 lb. \$5.53, lb. \$20.10, 3 lbs. \$90.18.

FORD'S WHITE SUREHEAD. A little later than Snowball, with larger leaves. Very solid, white heads, of finest quality. It withstands dry, hot weather remarkably well. It is similar to "Dry Weather" or possibly the same. Price same as Early Snowball.

EARLY EXCELSIOR. Produces large, solid white heads, which are protected from the sun by large leaves, hence requiring less labor in covering the heads than some other varieties. It is early and is, we think, the best of the cheaper varieties. Pkt. 10c, 1/4 oz. 50c, 1/2 oz. 80c, oz. \$1.35, 1/4 lb. \$4.03, lb. \$15.10.

"Your Cucumber Seed cannot be beat."—Barnett Graham, Ohio.

"We find that all of your seeds are all that you recommend them to be. Glory Cabbage is certainly grand. Ford's Early can't be beat, it has all the quality that Corn can have. Golden Sugar also has a fine flavor."—D. L. Parisian, Mich.

Ford's Sound Sweet Corn

For a good many years we have been specially interested in developing new varieties of Sweet Corn. A good many experiments have been made, and from all of these we have retained four sorts that we can recommend to all our friends—Ford's Early, Ford's Golden Sugar, Ford's Nectar and Ford's Improved Mammoth. These four Sweet Corns will keep your table supplied from early summer until late September, or even into October.

Sweet Corn should be planted from May 1 to July 1, in hills 3 to 4 feet apart each way, 5 kernels to a hill, covering an inch deep. When the plants are 4 to 5 inches tall, pull out all but two or three. Cultivate frequently.

One pound of seed will plant about 200 hills; 12 pounds for an acre. As there is no legal weight for Sweet Corn, we quote it by the pound. Different varieties vary in weight per measured bushel, from 40 to 48 pounds.

SEMESAN JR. will prevent root rot, smut and other fungus diseases of corn either Sweet or Field varieties. You treat the seed before planting it usually pays to use it.

As it is a poison it cannot be mailed. $\frac{1}{4}$ lb. 60c, lb. \$1.75, 5 lbs. \$8.00, 25 lbs. \$37.50.

Ford's Early. Ready for use in 60 to 65 days after planting. Scores of our customers who know this variety say that it surpasses all other early white Sweet Corns in quality. The ears are from 8 to 10 inches long, and contain 8 rows of pure white kernels, which are large and extra deep for an early Corn. The stalks grow 5 to 6 feet high, can be planted more thickly than most varieties, and frequently produce two ears to the stalk. On account of its earliness, size and quality, it is unsurpassed by any variety for home use or market purposes. Many of our market-garden customers practically monopolize the early trade in Sweet Corn by growing Ford's Early. It very frequently sells for 50c per doz. on the early market. If the seed is planted at intervals of about two weeks through the season, Ford's Early will furnish a succession of Sweet Corn until frost kills the plants. See illustration at the left. Pkt. 10c, $\frac{1}{2}$ lb. 17c, lb. 30c, 3 lbs. 71c, 5 lbs. \$1.08, 10 lbs. \$1.98, prepaid. Not prepaid, Pkt. 10c, $\frac{1}{2}$ lb. 12c, lb. 20c, 3 lbs. 57c, 5 lbs. 90c, 12 lbs. \$2.04, 50 lbs. \$7.50, 100 lbs. or over at 14c per lb.

Nectar. The grandest of all second-early Sweet Corns. Nectar was originated by Mr. Hamilton DeGraw, of New York, in 1906; it is a cross between Malakhoff and White Evergreen. It is unusually productive. It is very hardy and will stand more wet and cold weather without rotting in the ground than many early varieties. The stalks grow from 6 to 7 feet high, and many of them produce two large ears. There are usually 12 or 14 rows of very deep, pure white kernels, resembling Stowell's Evergreen. For market-gardening this is the best second early variety to follow Ford's Early. The ears will remain in good condition for some time after they are ready for the table. Price same as Ford's Early.

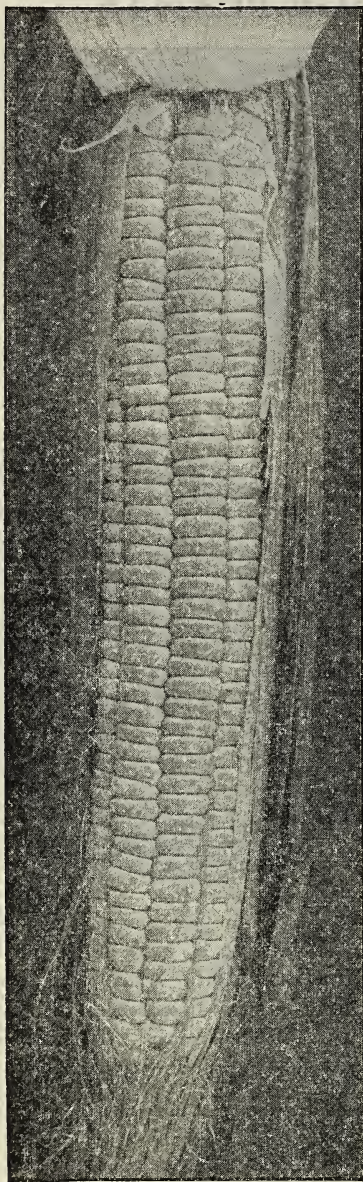

Ford's Golden Sugar. This new Corn is a cross between the White Evergreen and Golden Bantam. In 1915 we offered it for sale for the first time and it has given excellent satisfaction to those who have grown it. It is sufficient to say that of all the yellow Sweet Corns you will like this the best. The stalk grows 6 to 7 feet tall; ears are of good size, larger than Golden Bantam, and mature a little later than that variety. Thus it would be classed as a medium late variety. It is of a rich golden color, and our customers say it is the finest flavored yellow Sweet Corn they have grown. Price same as Ford's Early.

FORD'S IMPROVED MAMMOTH

A late all-round, every-purpose variety. For market, for canning, drying, or other home uses, the quality is unexcelled. If the seed is not planted too thickly the stalks will usually produce two ears each. The ears are large, medium thick, remaining good for table use for some time after maturity. Price same as Ford's Early.

GOLDEN BANTAM. Well-known yellow variety, with small stalks. Ears are usually not more than 5 inches long, but the grains are quite broad and exceedingly sweet. Ready for the table just after Ford's Early starts. This is the most widely known yellow variety of sweet corn. Price same as Ford's Early.

DE LUE'S GOLDEN GIANT. This corn is about same season as Golden Bantam, has the same desirable quality of that popular variety; but produces much larger ears, which are 7 to 3 inches long and contain 14 to 18 rows of yellow kernels, of sweet, luscious flavor. It is sometimes sold as Improved Golden Bantam. For market or home use it is a decidedly valuable variety. Price same as Ford's Early.

Raise More Sweet Corn—It's Good and Pays

Barden's Wonder Bantam, a Most Valuable Sweet Corn

Barden's Wonder Bantam. If we were to add another variety to the Ford's Four Leaders it would be Barden's Wonder Bantam. It is almost identical to Ford's Early in earliness, size of ear and growth of stalk, but it is of a golden yellow color. Being a descendant of the well known Golden Bantam it has retained all the fine qualities of that variety, but produces eight rowed ears 8 to 10 inches long of fine quality. As it has such fine long ears it is a wonderful market or home use variety that is sure to please all who use it. Pkt. 10c, $\frac{1}{2}$ lb. 19c, lb. 35c, 3 lbs. 86c, 5 lbs. \$1.33, 10 lbs. \$2.48, prepaid. CARROTS

Choice Seed for the Most Critical Gardeners

For an early crop the seed should be sown from the first to the middle of April, and for the later crop about the first of June. The seed should be planted in drills about 14 inches apart, covering about $\frac{1}{2}$ inch; when the plants come up, thin to 4 inches apart in the row. The soil should be fertilized the fall preceding. Fresh manure should never be used. Cultivate at frequent intervals if you wish your crops to mature quickly, or if extra large specimens are desired. An ounce of seed will sow 100 feet of drill; 3 to 4 pounds for one acre.

Prices quoted include postage. If to go by exp. or freight, not prepaid, deduct 3c from $\frac{1}{4}$ lb., 10c from lb., 18c from 5 lbs., 28c from 10 lbs.

FORD'S SOUND CUCUMBER SEED

Grown from Carefully Selected Stock Seed
It Pleases the Most Critical Market Gardeners

CULTURE. For early cucumbers start the seeds in a hotbed about the first to middle of April. 4-inch paper or clay pots may be used or squares of sod with grass side down. Plant 10 or 12 seeds in each pot. Transplant to open ground when danger of frost is past, spacing the hills at least 4 feet apart each way; allow only 4 or 5 plants to grow in a hill. For first out-of-door planting May 15 is about the earliest safe date. Plantings may be made at intervals of two or three weeks up to July 10. For main crop for pickles we have found June 20 to July 10 most satisfactory. FORD'S CELERY

On Suitable Land, Celery is a Big Money-Maker
Our Seed Is of the Finest Quality

CULTURE. For early Celery sow seed in February or March in hot-beds. Transplant when two or three leaves develop. Plant in field when danger of frost is passed in rows 3 to 5 feet apart and 6 inches apart in the rows. Blanch by banking up with soil or placing boards or paper against the rows. Sow seed for late Celery in seed-beds in April or May.

Wonderful. THIS HAS PROVEN TO BE THE BEST OF ALL EARLY MARKET VARIETIES. IT BRINGS THE HIGHEST PRICE, BECAUSE OF ITS LARGE SIZE, HIGH QUALITY, EXTREME EARLINESS, AND BEAUTIFUL APPEARANCE.

From all we can learn of the "Wonderful" it has proven to be indeed the most wonderful celery ever introduced and has created a sensation wherever grown.

The "Wonderful" was originated by Mr. S. J. Meisch and is the result of twenty years of Systematic Seed selection. Celery growing made Mr. Meisch rich and this celery which was the triumph of his life work is a fitting and most valuable heritage to all celery growers.

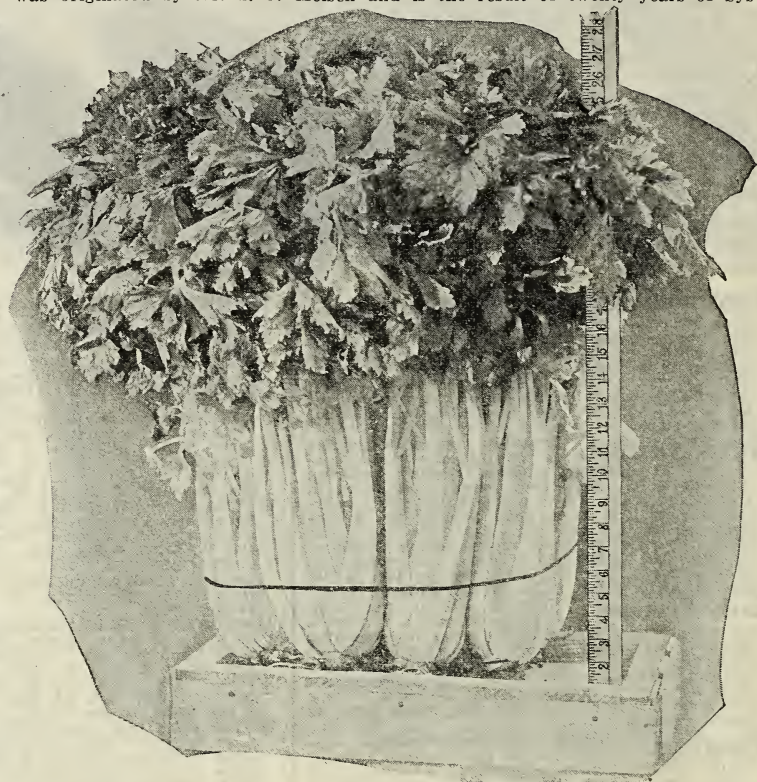

Authorities pronounce this the best Self-blanching celery. It matures two to three weeks before any other and blanches in half the time required by others.

It is large; the illustration shows its immense size. Notice the yard stick in comparison.

The stalks are broad and solid (do not grow hollow) and just tall enough to pack in crate without damaging the foliage.

The quality is very fine making it all in all a desirable and profitable celery for any purpose. It always commands the top price in market and has sold as high as \$1.25 per bunch of twelve stalks.

It is recommended by many Agricultural College professors, Commission Merchants and large celery growers and we feel safe in saying that we believe it to be all that is claimed for it. Pkt. 10c, ½ oz. 90c, oz. \$1.50, 2 ozs. \$2.50, ¼ lb. \$4.28, lb. \$13.10.

FORD'S SOUND LETTUCE SEED

Lettuce may be grown in hot-beds in winter, but for ordinary garden sow as soon as spring opens and thereafter in succession once in two or three weeks. Make the rows 15 inches apart and cover $\frac{1}{4}$ inch deep with fine soil, which should be firmed above the seeds. When the plants are up thin out to 3 or 4 inches apart and when those remaining are large enough for use, every other one may be taken out and leave room for the remaining ones to grow.

The head varieties should have 10 to 12 inches of space between the plants to form good heads.

Our Lettuce Seed is very carefully selected and will please the most critical gardeners.

The Glad Gardener says: Grand Rapids Lettuce is a winner.

FORD'S MUSKMELONS

Melons are strictly a tropical fruit, and there is no use in planting the seed before the ground is warm. The middle of May is plenty early enough to put in the seed, but if extra-early melons are desired; the seed may be sown in a hotbed on sod and transplanted in the same manner as cucumbers. The hills should be made at least 6 feet apart each way for Muskmelons, and 8 feet for Watermelons. The hills should be prepared in practically the same way as for cucumbers. When the plants come up and danger of bugs is over, thin them out to three or four plants to the hill. Hammond's Slug-Shot, sprinkled freely over the young plants, will prevent serious damage by the bugs and will not injure the plants. Spraying with Bordo will prevent blight. We can supply both of these. See quotations elsewhere in this book.

PRICES quoted include pre-payment of postage. If to be shipped by express or freight deduct 3c from ¼ lb., 10c from lb., 18c from 5 lbs., 28c from 10 lbs.

FORD'S SOUND ONION SEED

It is of the utmost importance to use good seed, not only good, strong-growing seed, but seed that has been saved from good, well-ripened and selected Onions. We offer the best possible strains, and have taken particular care in the selection of all the varieties we list herewith.

Prices on Onion Seed include postage. If to be shipped by express or freight or called for at our store deduct from prices quoted 3c from $\frac{1}{4}$ lb., 10c from lb., 18c from 5 lbs., 28c from 10 lbs.

CULTURE. Onions require a fertile soil, well pulverized and drained. Sow in rows 12 to 15 inches apart, covering the seed $\frac{1}{4}$ inch deep. When the plants are 3 or 4 inches high thin them out where too thick in the row. Cultivate thoroughly. 1 oz. will sow 200 ft. of row, 4 or 5 lbs. per acre.

STOP VERMIN sown in the row with seed keeps the onion maggot away. Spraying with "Evergreen" or "Black Leaf 40" destroys the thrip. But seldom is spraying necessary.

ONION PLANTS

Crystal Wax and Yellow Bermuda

These varieties are very sweet and mild and may be eaten like apples. Their fine quality wins the praise of all who like fine onions.

Onion plants are becoming more popular each year and taking the place of onion sets to a considerable extent. They make onions two weeks quicker than sets and four or five weeks quicker than seed. Hence the advantage of the plants.

We grow these in the South and can ship any time from Jan. to May. Our sales of these have increased from year to year and our customers are enthusiastic over the crops grown from them. The early crops bring the high price.

Onion plants may be planted early. Even if frozen down they come on again and make good crops. For small gardens these may be planted in rows 6 inches apart and 3 inches apart in the rows.

All Onion Plants are tied 100 to the bunch. Orders should be for even hundreds.

Onion Plants are GUARANTEED to reach you in good condition and full count and if you are not satisfied your order will be refilled free of charge.

Price prepaid, 100 plants 35c, 200 for 65c, 300 for 85c, 500 for \$1.35, 1000 for \$2.25. Not prepaid, 100 for 25c, 200 for 45c, 300 for 65c, 500 for \$1.00, 1000 for \$1.50, crate of 6000 for \$5.75, 5 crates for \$25.00.

CERTIFIED SEED POTATOES

The term "Certified" as applied to Seed Potatoes implies that the crops while growing and after digging have been inspected by good authorities and have been found comparatively free from any disease.

To pass inspection these crops must be vigorous to withstand the ravages of disease. This vigor gives to the seed the ability to produce big crops increasing the yield per acre 30 to 80 bushels according to the variety.

The increased yield more than pays for the seed even at the higher price of the certified seed. The crop raised from it is of better quality and sells at the highest price.

We always try to have the best of everything and believe in handling Certified Seed Potatoes, we are giving our customers the best possible in seed potatoes.

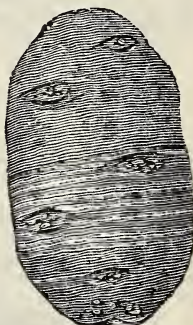

All orders should be in early. Increase your yield by planting Certified seed this year.

We quote at time of making up this catalog prices as shown below. Prices subject to change.

We may have others to offer when shipping season opens.

FORD'S SELECT TOMATO SEED

Our list is comprised of the very best of the older and newer varieties. It is our aim to keep our list down to the very best varieties. Tomato seed is one of our specialties and for this reason we are satisfied with none but the best seed, of well tested varieties.

CULTURE—Sow seed in hotbed in March or April, in rows 3 inches apart, covering the seed $\frac{1}{2}$ -inch deep. Water with quite warm water. When the plants are 2 inches high, transplant into flats 2 to 4 inches apart, or into 3 or 4 in pots. Set in open ground when all danger of frost is over, in rows 4 to 5 feet apart and 3 feet apart in the row. Sprinkle a handful of ground bone in each hole before setting the plant. Tomatoes may be tied up to stakes with soft twine, and for the home-garden it is a good plan as the plants may be set closer together than if allowed to run at random.

CLARK'S EARLY ORANGE DENT

A NINETY DAY YELLOW CORN

Safe for Northern Ohio, Pennsylvania, Indiana, Michigan and New York.

A VARIETY OF OUTSTANDING MERIT

On March 13, 1928, our grower of this variety in Northern Ohio wrote us: "We planted 160 acres of this corn the past season and in one of the poorest corn years (1927) we have ever had, it proved to us, all that we claimed for it. The color is so beautiful that we gave it the name of Clark's Early Orange Dent."

This new corn ripened last year (1928) in 90 days from time of planting, which was at least 10 days ahead of a certain so-called "80 day Red Cob."

We honestly believe that in the "Clark's Early Orange Dent" we have the earliest yellow corn, one that our northern growers may safely plant and be sure of a crop of ripe corn year after year. See illustration on front cover.

DESCRIPTION—Stalks 9 to 11 ft. tall, height of ears from ground 4 to 5 ft., length of ears 7 to 9 inches, 16 to 20 rows of kernels, small red cob, matures in 85 to 95 days according to season.

Our grower reports, that it is "Best Quality," "Purest Type" and "Most Beautiful" corn in cultivation. "Farmers who have grown it for the past two years will grow no other kind." "For the past three years it has out-yielded any other variety in Northern Ohio."

This corn we offered under the name of Early Yellow Dent, but to distinguish it from another variety of same name its name was changed to Clark's Early Orange Dent.

It gave our customers excellent results last year and we are now more enthusiastic than ever about it.

It is a heavy yielder both of ears and shelled corn, and on account of its beautiful golden color brings top price in market.

We take great pleasure in offering this corn to our customers, with the utmost confidence that it will prove entirely satisfactory to all who plant it. Price prepaid lb. 28c, 3 lbs. 78c, 5 lbs. \$1.00. Not prepaid 7 lbs. 75c, pk. (14 lbs.) \$1.15, 1/2 bu. (28 lbs.) \$2.25, bu. (56 lbs.) \$4.25, 2 bu. \$8.00, 4 bu. \$15.60, 10 bu. \$38.00.

FORD'S SURE CROP. Stalks grow 7 to 10 feet tall, ears 7 to 9 inches long, kernels long, yellow with reddish cast.

When planted on good soil the first part of May, with favorable weather and good cultivation, it produces an immense crop of grain, but may be planted up to last of June for Ensilage purposes and usually ripens when planted as late as June 1st. Choice Northern Ohio grown seed. Prepaid lb. 25c, 3 lbs. 59c, 5 lbs. 93c. Not prepaid 1/2 pk. (7 lbs.) 70c, pk. (14 lbs.) \$1.15, 1/2 bu. (28 lbs.) \$2.00, bu. (56 lbs.) \$3.75, 2 bu. \$7.00.

WHITE CAP YELLOW DENT. Stalks 6 to 9 feet tall, ears 7 to 10 inches long. Kernels light yellow with white cap. We consider this a perfectly safe corn to plant for a grain crop. Usually matures in 100 to 110 days. It is also valuable for Ensilage and may be planted as late as July 1 for this purpose. Price same as Ford's Sure Crop.

IMPROVED LEAMING. Matures in 110 to 120 days; stalks 8 to 10 feet; large, long ears; kernels deep golden yellow. With long season there is no better variety. Excellent for ensilage. Price same as Old Virginia.

LONGFELLOW FLINT. The best early; yellow flint corn; long ears; a big yielder. Northern Ohio grown. Price same as Ford's Sure Crop.

SILVER KING. Matures in 100 to 110 days. Pure white, ears 7 to 9 inches long, a wonderful sheller and yielder. Northern Ohio grown seed. Same prices as Ford's Sure Crop.

See illustration on front cover.

ENSILAGE CORN

MEADOWBROOK ENSILAGE or Yellow Ensilage. This corn matures earlier than the Old Virginia, and for this reason is preferred by some of our customers. The stalks and ears are large. The kernels are yellow and smaller in size than Old Virginia and drills readily with the ordinary field corn planter plates. If you are looking for an early ensilage corn this variety will suit you. Price same as Old Virginia.

EUREKA. A valuable Ensilage probably the nearest approach to Old Virginia in yield. It has a short blunt kernel, is liked by a few of our customers on account of the shape of kernel. Price same as Clark's Early Orange Dent.

Cutting Old Virginia Corn

Ford's Old Virginia Corn Makes Best Silage

FORD'S OLD VIRGINIA ENSILAGE CORN

The Dairyman's Most Profitable Crop

Some of our largest dairymen declare, that **FORD'S OLD VIRGINIA** Ensilage Corn is superior to any other variety, being much sweeter, larger ears, keeps better in the silo and produces the largest amount of milk and meat. It is unequalled for silage feeding and produces more tons of rich, juicy silage than other varieties.

We cannot exaggerate the merits of this wonderful corn for silage purposes.

We first introduced this corn to the dairymen of Ohio and have been headquarters for the **TRUE OLD VIRGINIA** for many years.

We sell thousands of bushels of the **OLD VIRGINIA** every year, which would be impossible if it did not give perfect satisfaction.

IF YOU WANT TO FILL YOUR SILO FROM FEWER ACRES, PLANT FORD'S OLD VIRGINIA.

In the past there has been quite a lot of white corn sold as Old Virginia, which did not measure up to the standard. Be sure you get the true Old Virginia from headquarters.

Our seed is exceptionally choice and of strong vitality. If you are not satisfied with it when received return it and your money will be cheerfully refunded.

On the Belmont County (Ohio) Experiment Farm in 1926 Old Virginia Corn yielded 16.1 tons per acre on land which had been planted to corn continuously since 1917.

In 1917 this field was planted to Clarage and yielded 10 tons per acre. In 1921 to Dark County Mammoth and yielded 8 tons per acre. In 1922 to Eureka and yielded 11.8 tons per acre. The other six years during this period it was planted to Leaming which produced an average yield of 7.2 tons per acre. The highest in any one year of Leaming was 8.9 tons per acre.

Below we give a few testimonials from those who have put Old Virginia to the test.

Ford's Old Virginia, Biggest Yielder; Makes the Most and Best Ensilage

"This is Old Virginia Ensilage Corn. 13 feet 4 inches high (off year). We have had it 14 feet 2 inches high. We used to plant 5 acres to fill a silo 10x28 feet; now 2 acres of Old Virginia fills it up chockfull and some to spare."—Harlon Shelley, New York.

"I have used Old Virginia Corn for two seasons. Last year I filled a 10x36 silo from 1½ acres. This corn grew to a height of 15 feet. A good many of my neighbors are sending to you for Old Virginia on account of this wonderful field of corn."—R. E. Fritzel, Ohio.

"Last year I bought a bushel of Old Virginia Seed Corn and I raised enough Corn to fill one silo 10x30 and one 10x24 on 6 acres. Many stalks were 17 feet long. Believe it was the biggest Corn grown in this country last year. It pays to buy good seed."—W. L. Stearns, Ohio.

"Last year I planted 3 acres in Old Virginia Corn and filled two silos holding 124 tons and had at least 15 tons left. Now I am ordering for myself and four of my neighbors. Next year you will have a big demand from this section of country."—Jas. McGhee, Ohio.

"We tried your seeds a year ago, and they were certainly fine. The Old Virginia Ensilage Corn grew stalks 16½ feet tall. Four acres, checked, three stalks in a hill, filled an 80 ton silo, and made excellent feed. It was the biggest piece of Corn I ever raised."—Earl A. Valentine, Mich.

"I have tried Old Virginia before, and can say that it produces large crops for the silo."—Deleus Anderson, Minn.

"CROW-TOX"

Prevents Birds and Animals From Pulling
Young Corn

It drives blackbirds, crows and other corn-pulling birds and animals away from the corn hills and prevents the havoc which often destroys the corn field and makes re-planting necessary. "Crow-tox" Repellent protects the corn grower against this great loss.

It is non-poisonous and will not injure the seed, it aids germination and makes healthier stalks.

Put the seed corn in a pan or tub, pour "Crow-tox" Repellent over the corn and mix thoroughly. The corn may be planted immediately as it will not clog the planter. "Crow-tox" is fully guaranteed by the manufacturers to give entire satisfaction.

FORD'S FANCY LAWN GRASS MIXTURE

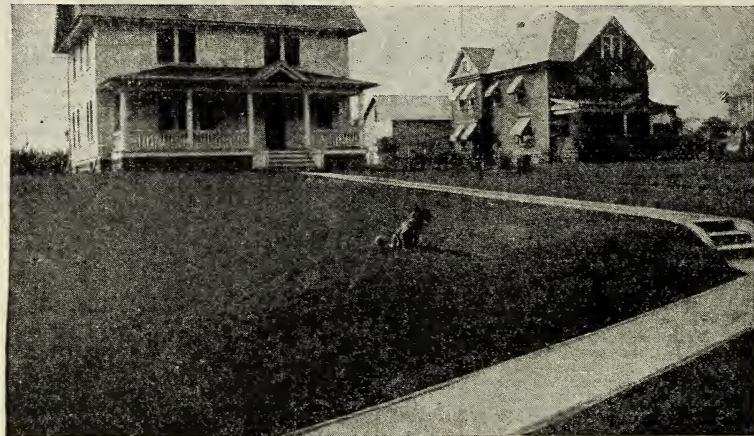

MADE FROM HIGH GRADES OF SEEDS ONLY

This is our popular and reliable mixture for producing a thick, permanent green turf. None but high grades of seed are put into it.

The grasses which go to make up this mixture are selected with the idea of making a quick and at the same time a permanent tough sod. Our sales of this seed have been enormous and our customers have been universally satisfied with it.

To make a good lawn the soil should be made comparatively rich and raked till it is perfectly smooth. Sow the seed at the rate of one pound to 300 square feet using a lawn roller after sowing the seed. For fertilizing Pulverized Sheep Manure, Vigoro and Sulphate of Ammonia are suitable. These you will find quoted elsewhere in this catalog.

Ford's Sound Flower Seed

DIRECTIONS FOR GROWING

More flower seeds are probably destroyed by planting too deeply than by any other one cause. Such small seeds as Petunia, should be merely covered lightly, whether in open ground or in boxes. In preparing the ground, provide very fine soil, pressed down lightly and evenly and moistened thoroughly with warm water. When the water has soaked away, sow the seed, cover evenly with fine, dry soil not over 1-16 inch for the finest seeds and 1/4 inch for seed the size of Pansy seed.

If the bed is small enough lay glass flat on the surface; this will keep the ground from baking and will prevent washing in heavy rains. When growth has begun, lift the glass slightly by propping it with something and when it is finally removed the young plants should be shaded with thin cloth or paper if the sun is very hot. Keep the bed well weeded, and the soil frequently stirred to prevent the formation of crust.

Young plants are liable to "damp off" and should be watched carefully. If the seed is treated with "SEMESAN" and the soil sprinkled with "SEMESAN" it will prevent this disease to a large extent. You will find "SEMESAN" quoted elsewhere in this catalog.

"SHEEP MANURE" is a safe and very effective fertilizer for flowers of all kinds. See quotations elsewhere.

For convenience in ordering we give each variety a number, which should be used in place of the name. This will help us in filling orders and will also prevent mistakes. Abbreviations are as follows: A., annuals, or plants which live only one year; B., biennials, or plants which live two years; H., hardy; H. H., half-hardy; P., perennial or hardy plants which live for a number of years; M. indicates several varieties mixed in the packet. All seeds in the following list will be sent postage prepaid. Order by number.

The later plantings usually produce the finest flowers.

25 Lavender	29 Mixed

37 Heart of France Aster

The best pure red Aster ever introduced. Opening red as the purest ruby, it deepens with age and retains its remarkable beauty to the very end. The petals appear strikingly changeable, showing now a glow and sheen quite unique, now a soft, warm velvety texture. The flowers are large and full. The plants are of branching type and very robust habit. The stems are long and strong. The plants begin to bloom quite early in the season and retain their brilliancy and luster for a longer period than almost any other color. It has supplanted all other red Asters because of its marvelous beauty. Pkt. 15c, $\frac{1}{4}$ oz. 30c, $\frac{1}{4}$ oz. 50c.

38 NEW FANCY YELLOW. One of the largest Aster growers in the U. S. says of this new variety: "This is by far the best yellow we have yet grown. It is fairly large and fully double." We believe our friends will like it. It is the only Yellow Aster that we offer. Pkt. 15c, 4 Pkts. 50c.

39 Vick's Silvery Rose Aster

Here is another robust, long-stemmed, large-flowering variety. Every petal is a combination of deep lilac-rose, almost cerise, very delicately threaded with white. The threads are so tiny as to give the petals a silvery sheen. Even the slightest change in light will shade the petals from a rich glowing, rosy cerise to a silvery rose. The old-fashioned color, ashes of roses, exactly describes this color. The plants are very vigorous. The stems are unusually long and the flowers very large. This variety stands out above every other in the field in which it grows for size and vigor. Pkt. 10c, $\frac{1}{4}$ oz. 30c, $\frac{1}{4}$ oz. 50c.

40 NEW JAPANESE, or OSTRICH FEATHER. Immense flowers 5 to 6 inches across. Petals long, waved and curled; plants 15 to 18 inches high; well-branched. M. Pkt. 8c, $\frac{1}{4}$ oz. 25c.

AN UP-TO-DATE LIST OF CHOICEST VARIETIES

We have revised our list of Sweet Peas, and have added varieties that have proven of decided merit and which are the best of their respective colors and classes.

CULTURE—Sow early in spring in mellow soil, making trenches 5 inches deep. Cover the seed at first 2 inches, filling up the trench as the plants grow. Fertilize with **Sheep Manure**, or **Vigoro**, quoted elsewhere in this book, or other fertilizer. Keep the rows well cultivated. If weather is very dry, watering should be done if convenient. Pick the flowers every day or two and they will continue to bloom for a long time. If aphid attack the vines spray with **Evergreen** or **Derrisol** quoted elsewhere in this catalog.

Ford's Small Fruit Plants

STRAWBERRIES

These plants are grown on good land and are strong and vigorous and will give the best possible results.

We guarantee the safe arrival of these plants. Should they fail to grow we will replace them at one-half price if ordered before the spring shipping season of the following year is over. We do not handle Strawberry plants in the fall.

Varieties marked P. are Pistillate and require some Bisexual (B) variety planted near them in order to produce fruit.

BISSELL. (B) This is one of the most vigorous growing varieties we have ever seen. The fruit is of largest size, very firm, high quality, bright red color and commands top notch price in market. Ripens mid-season to late.

DR. BURRILL. (B) This is an improved Senator Dunlap and what may be said of the latter will apply also to the Dr. Burrill. It produces lots of plants and yields large crops. It ripens medium-early. Fruit is of good size, firm, dark, glossy red, or even shape and high quality. One of the real good older varieties.

GIBSON. (B) A leading market variety either for home or distant shipping, as it is firm and holds up well. An abundant bearer, the vines which are strong are loaded with fruit of large size, which is dark glossy red, extending clear through to the heart. Especially valuable for canning. It has been thoroughly tried and proven a success in all kinds of soil. It ripens medium late.

PEARL. (B) Latest of the June bearing varieties. Large size, dark red, firm. Coming as it does so late it sells for high price.

PREMIER. (B) The earliest of all. Too much praise cannot be given this most wonderful early berry. While extremely early it seems to be frost resistant. It has given perfect satisfaction wherever grown, and produces abundant crops. The berries are large, bright red color, sweet of fine quality, and very uniform in shape and size. It is an all around strawberry, good for market, table use or canning. A money maker for the commercial grower.

SAMPLE. (P) Large; firm; commences to ripen in mid-season, and continues till late; healthy; fruit good quality. One acre produced 30,000 quarts 30 months from planting. No berry has stood the test under all conditions better than the Sample.

WM. BELT. (B) A berry of finest quality, usually conical form, sometimes cockscombed. Large; dark red, good for market or home use.

MASTODON EVERBEARING B

The largest of all Everbearing Strawberries, 13 berries have filled a quart basket. It bears from August to freezing weather stops it the same year as planted and then again the following June and again in the fall. The berries are not only large but are of fine quality and bright red attractive color. The plant is vigorous and very productive, more so than any other Everbearing variety. The proper way to treat the plants after setting is to keep all blossoms picked off until July. Then they will continue to blossom and bear fruit till snow flies. You will find a lot of satisfaction in this wonderful berry either for home use or market. It has proven a really profitable variety for fall market.

THE "FORD" PEAR

PRACTICALLY SEEDLESS and CORELESS—Excellent Quality, Beautiful Color, Good Seller, Splendid Canner, No Waste, Tree Hardy

FORD PEAR greatly reduced and cross section showing absence of core and seeds.

This is one of our introductions which we want everyone who reads this catalog to plant and in order to have it thoroughly disseminated we are offering: **One Root Graft Free with Every Order of \$5.00 or Over.** While the few thousand we have set aside for this purpose last and if asked for when order is given. See next page.

Make a Nice Planting of Shrubs

We are pleased to offer this wonderful Pear of our own introduction, and are confident it will become a world-wide favorite as soon as its splendid qualities are known. The Ford is practically free from seeds, about nine-tenths of the fruits containing none at all, and we have never seen more than two seeds in any single specimen.

There is also no core to speak of. Illustration of this Pear was made direct from a photograph and shows a section of a specimen cut through the center. Notice that it shows no core or seeds at all. The absence of core and seeds makes the FORD a splendid Pear to can, as there is practically no waste. The quality of the FORD Pear is rich, sweet and juicy, and the color is a rich yellow when fully ripe. It is similar in appearance to the Bartlett, but has a distinct flavor and is three weeks later.

Being very desirous to have this pear grown by all our customers we have made up a few thousand root grafts which can be sent easily by mail and if set so that only 2 inches of the graft is above ground they will grow into nice trees very quickly. Price Root Grafts, each 25c, 3 for 50c, 7 for \$1.00, 15 for \$2.00.

We have a few large trees of the "Ford" Pear that we offer at \$1.50 each.

RARE AND BEAUTIFUL ROSES

For the past two years we have sold thousands of these roses and they have been very satisfactory. We can fill orders any time during the spring, summer or fall, with these plants.

Semesan

The Semesan Seed Disinfectants are not miscellaneous by-products of a great chemical manufacturing organization diverted into useful consuming channels but, instead, they are the successful result of a deliberate and painstaking determination by some of the world's foremost agricultural chemists to discover and invent the finest seed disinfectants that science can devise. Ask for booklet giving further information in regard to Semesan products. As these are all poisonous they can not be mailed.

Semesan has inherently superior disease infection properties that are possessed by no other chemical now known. It is amazingly effective against an enormous array of fungus growths, disease germs and other micro-organisms without at the same time being harmful to the higher forms of life to which the seeds and plants belong. Of tremendous interest to the user is the fact that with Semesan, the need for a specific remedy to treat each type of disease is no longer present because Semesan covers practically the entire range of the grower's requirements. Moreover, the facility with which Semesan can be applied is an enormous advantage to the consumer since it is the only disinfectant that can be employed in either dust or liquid form. Price 2 oz. 50c, 8 oz. \$1.60, lb. \$2.75.

Semesan, Jr., a modified form of the parent substance, Semesan, was developed specifically for the easy dust disinfection of field and sweet corn to prevent the common ear, root and stalk rots that cause the major portion of our Corn Belt's crop loss of 300,000,000 bushels each summer. Semesan Jr. not only effectively controls corn diseases but it also stimulates seedling and plant growth, promotes earlier maturity, improves quality and increases yields. Tests conducted by the U. S. Department of Agriculture prove and confirm the excellent results reported by farmers from every section of the country. 2 oz. for each bushel of corn. Price 4 oz. 60c. lb. \$1.75, 5 lbs. \$8.00, 25 lbs. \$37.50.

Semesan Bel is the instantaneous dip dipotato-growing sections of the United States by storm. Easily and quickly applied by the dust or liquid methods, preferably the latter, Semesan Bel controls the common seed-borne diseases of white and sweet potatoes, as well as of other roots and tubers of flowers and edible plants. It preserves the seed piece against soil-borne organisms, stimulates sprouting, induces earlier maturity and increases the yield of finer, disease-free, unblemished crops. 1 lb. will treat 15 to 20 bushels of potatoes. Price, lb. \$1.75, 5 lbs. \$8.00, 25 lbs. \$37.50, 50 lbs. \$72.50.

Needs no mixing, always ready for use. Far superior to any other material or device for destroying Canker Worms, Gypsy, Brown-tail and Tussock Moth Caterpillars. Make application about March 1st. Also good for covering wounds caused by pruning trees or other injury to the bark. 1 lb. 60c, 5 lbs. \$2.75, 10 lbs. \$5.25, 25 lbs. \$11.00. If to go by mail add postage 10c lb., 18c for 5 lbs.

Miscible Oil for Dormant Spraying

This product is made in strict accordance with the formula as supplied by the United States Department of Agriculture. It is a rich, creamy white product.

For dormant spraying and for San Jose Scale, it is used 3 gallons in 100 gallons of water.

The cost of this product to the user is about one-fourth that of other advertised Miscible Oil Sprays.

This spray has been extensively tested and used where San Jose Scale, Oyster Shell Scale, etc., was very bad; and, after several years' test it has proven to give almost perfect control of scale.

Freezing will break down emulsion and it cannot be used with Lime Sulphur. It spreads and covers well and will not injure spray pump. Not mailable. Price quoted on request.

E-Z-Bos Cow Spray

E-Z-BOS is made of highly refined insecticide oils containing an ingredient that actually **KILLS** flies and keeps them off a long time. It is a fully guaranteed spray and will entirely rid your stock of lice and the torture of flies.

Try a can of **E-Z-BOS** Cow Spray and Lice Killer. You will discover that **E-Z-BOS** will give results and accomplish the work a fly spray should. It is not merely a fly chaser. It actually kills 'em and keeps flies off your stock. We guarantee **E-Z-BOS** to do this. If it fails return the empty can and your money will be refunded.

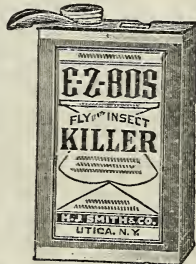

Cows tortured by flies lose flesh and appetite. They waste energy by stamping and lashing at flies. This energy should go into building and secreting milk. Cows allowed to satisfy their appetite in peace by being free from flies will show an increase in milk production.

Lice and mites are never found in poultry houses that are sprayed thoroughly once in two weeks with **E-Z-BOS** Fly and Insect Killer.

E-Z-BOS is highly useful as an aid for the disinfection of stables, barns, outhouses and other such places. Price, gal. \$1.00, qt. 40c, not mailable.

The "Bacon" Seeders

The large heavy drive wheel of the "Bacon" is on the rear, which results in three important points of superiority over other seeders which have the front wheel drive:

(1) In working any hand seed drill there is a natural tendency to throw considerable weight downward on the handles, which results in raising the front wheel somewhat off the ground which results in spaces of light sowing, or no sowing whatsoever.

(2) THE "BACON" LARGE HEAVY DRIVE WHEEL BEHIND will not work into the soil but on it, thus running much easier.

(3) Because of the fact that on the "BACON" THE LARGE HEAVY DRIVE WHEEL IS BEHIND, the entire drilling unit can be removed by merely loosening two bolts, which leave the cultivator ready for the particular attachments desired without any modification of the front wheel or cultivator frame.

The feed of the "Bacon" drill is the most perfect to be found on any drill made. It is adjustable for sowing all kinds of seeds from turnip to peas. The construction of the feeding device insures an even flow of seed which is a most important point with all gardeners.

The "Bacon" Cultivator

Through the use of ribbed malleable frame and the proper distribution of metal, produce a line of hand cultivators which combine rigidity and strength with extreme lightness of working parts, enabling the operator to do unusually close work without fatigue. Every gardener that has used one vows that he would not be without his "Bacon" cultivator. Our attachments include everything which is necessary for the proper cultivating of all the regular crops.
